No new condition will be brought in while scrutinizing and evaluating the tenders.

### **26. Preliminary Scrutiny of Tenders**

- 26.1 The tenders will first be scrutinized to determine whether they are complete and meet the essential and important requirements, conditions etc. as prescribed in the tender document. The tenders, that do not meet the basic requirements, are liable to be treated as unresponsive and ignored.

  - d) Required EMD has not been provided.
  - e) Tenderer has quoted for goods manufactured by a different firm without the required authority letter from that manufacturer.

  - g) Goods offered are sub-standard, not meeting the required specification etc.
  - h) Tenderer has not agreed to essential condition(s) specially incorporated in the tender enquiry.

The Tenderer has however, quoted only for supply of the equipment).

If during the preliminary examination, BRBNMPL find any minor infirmity and/ or irregularity and/ or non-conformity in a tender, BRBNMPL may waive the same provided it does not constitute any material deviation and financial impact and, also, does not prejudice or affect the ranking order of the tenderers. Wherever necessary, BRBNMPL will convey its observation on such 'minor' issues to the tenderer by registered/ speed post etc. asking the tenderer to respond by a specified date. If the tenderer does not reply by the specified date or gives evasive reply without clarifying the point at issue in clear terms, that tender will be liable to be ignored.

**28. Discrepancy in Prices**

- 28.1 If, in the price structure quoted by a tenderer, there is discrepancy between the unit price and the total price (which is obtained by multiplying the unit price by the quantity), the unit price shall prevail and the total price corrected accordingly, unless BRBNMPL feels that the tenderer has made a mistake in placing the decimal point in the unit price, in which case the total price as quoted shall prevail over the unit price and the unit price corrected accordingly.
- 28.2 If there is an error in a total price, which has been worked out through addition and / or subtraction of subtotals, the subtotals shall prevail and the total corrected; and
- 28.3 If there is a discrepancy between the amount expressed in words and figures, the amount in words shall prevail, subject to sub clause 28.1 and 28.2 above.

**29. Discrepancy between original and copies of Tender**

In case any discrepancy is observed between the text etc. of the original copy and that in the other copies of the same tender set, the text etc. of the original copy shall prevail. Here also, BRBNMPL will convey its observation suitably to the tenderer by register Speed post and, if the tenderer does not accept BRBNMPL's observation, that tender will be liable to be ignored.

### **33. Schedule-wise Evaluation**

In case the List of Requirements contains more than one schedule, the responsive tenders will be evaluated and compared separately for each schedule. The tender for a schedule will not be considered if the complete requirements prescribed in that schedule are not included in the tender. However, as already mentioned in GIT sub clause 12.2, tenderers have the option to quote for any one or more schedules and offer discounts for combined schedules. Such discounts, wherever applicable, will be taken into account to determine the tender or combination of tenders offering the lowest evaluated cost for BRBNMPL in deciding the successful tenderer for each schedule, subject to that tenderer(s) being responsive.

### **34. Comparison on CIF Destination Basis**

If, there is more than one schedule in the List of Requirements, then, such determination will be made separately for each schedule.
- 36.2 The above mentioned determination will, inter-alia, take into account the tenderer's financial, technical and production capabilities for satisfying all the requirements of BRBNMPL as incorporated in the tender document. Initially, **Saving to Investment Ratio (SIR)** will be calculated by BRBNMPL for each bidders and based on the Saving to Investment Ratio value arrived, it will be decided whether the bidder is further considered for calculation of **Life Cycle Cost (LCC)**. (Calculation of Saving to Investment Ratio and Life Cycle Cost are explained below).

### **CONDITIONS FOR AWARDING OF CONTRACT BASED ON ORIGINAL QUOTED PRICE (OQP) OR ON LIFE CYCLE COST**

- a. If the Saving to Investment Ratio for those bidders are greater than one, then these bidders are further evaluated to arrive at their new ranking based on the Life Cycle Cost. Life cycle cost of respective bidder is sum of his OQP Price and his Total Operating Cost. Based on the new ranking derived, the contract shall be awarded on the OQP to the bidder whose Life Cycle Cost is lowest (as per Table 3).*
- b. If the Saving to Investment Ratio for those bidders are equal or less than one, then these bidders are not considered for further evaluation of Life Cycle Cost.*
- c. If none of the bidders' Saving to Investment Ratio is greater than one, then the contract shall be awarded to the Original Quoted Price L1 bidder (as per Table C of Section IX: Price Schedule).*
- d. It may be noted that higher SIR ratio is not the criteria to become L1. The bidder with SIR greater than one and least discounted Life Cycle Cost will be considered as L1 except in case of "C".*

#### **Example:**

If four bidders were participated in the Tender and if their Saving to Investment Ratio are found to be as given below

| Bidder     | Status as per OQP | SIR Ratio | Remark   |
|------------|-------------------|-----------|--|
| Bidder P – | L1                | NA        | Nil  |
| Bidder Q - | L2                | 1.70      | Qualifies for life cycle cost calculation                            |
| Bidder R - | L3                | 0.73      | Not considered for further evaluation of life cycle cost calculation |
| Bidder S - | L4                | 1.61      | Qualifies for life cycle cost calculation                            |

### **SAVING TO INVESTMENT RATIO (Table 3)**

**Saving to Investment Ratio** = Incremental saving Cost (B)/ Incremental Investment cost (A)

#### **Incremental Investment cost (A)**

Incremental Investment cost will be calculated for all the bidders with reference to Original Quoted Price L1 (OQP L1) bidder i.e. the Incremental Investment cost for all the other bidders is the difference of Investment cost of other bidder to the Investment cost of OQP L1 bidder. (as per the price submitted under Table C of Section XI: Price Schedule).

**Incremental Investment cost for a bidder (A)** = Investment cost of other bidders– Investment cost of OQP L1

**Example:- Incremental Investment cost of bidder Q** = Investment cost of bidder Q– Investment cost of bidder P

Incremental Saving Cost (B)

**Total Operating Cost** (for life cycle of the machine) = Ink consumption cost + Power consumption cost+ Maintenance spares cost

Incremental Saving Cost will be calculated for all the bidders with reference to OQP L1 bidder i.e. the Incremental Saving cost for all the other bidders is the difference of Total Operating cost of OQP L1 bidder to the Total Operating cost of other bidder.

**Incremental saving cost (B)** = Total Operating cost of OQP L1- Total Operating cost of other bidders

**Example:-** Incremental saving cost of bidder Q = Total Operating cost of bidder P- Total Operating cost of bidder Q

**LIFE CYCLE COST (Table 3)**

Life Cycle Cost = Investment Cost (OQP Price) + Total Operating Cost (for entire life cycle of the machine)

**(The contract shall be awarded on the Original Quoted Price to the bidder whose Life Cycle Cost is lowest as per Table 3).**

**Bank Guarantees to be submitted by the bidders**

**A. Performance Bank Guarantee**

1. Bidder has to submit performance bank guarantee for sum of 10% of the total CIF value of all the seven machines and 10% of the machine spare cost (10 years spares as given in the Table D of Price schedule) for a period of 10 years which is renewable periodically.
2. This performance BG is surety to prove the performance of all the machine's parameters & operational efficiency as claimed by the bidders during its entire life cycle of the machines (10 years) as per the prevailing supply of Ink, paper and other consumables being used for printing of Indian banknotes.
3. If any machine parameters (as per Section VII-Technical specification under Sl.No.3 Essential Machine parameters) are not proved by the bidder during FAT, performance BG will be invoked and purchaser may reject the machine consequently requiring the supplier to repay the total money paid for the machine within 3 months of such rejection, In such situation, purchaser reserves the right to place order on L2.
4. If the Ink and Power consumption is more than the claims made by the bidders during entire life cycle of the machine (10 years), then the

proportionate amount for excess ink and power consumption has to be reimbursed by the bidders on assessment of machine performance at the end of one year performance to BRBNMPL and necessary action to be taken to identify and rectification of the problem (which is in the scope of the bidder) for such excess consumption. Otherwise, the same amount will be deducted from the performance BG submitted and if the compensation amount is more than the BG amount, the bidder has to make the payment within 3 months from the date of notifying the compensation claim.

5. If any spare parts fail (other than the spares list submitted) under normal operating condition as per prevailing practice at our BRBNMPL presses, then the same has to be supplied by the bidder at free of cost during its entire life cycle (10 years). If the spares not supplied, the same will be procured by BRBNMPL and the actual cost incurred by BRBNMPL along with damages caused (Production loss/machine downtime) will be claimed from the performance BG submitted.

### **1. Ink Consumption cost (per billion notes)**

The bidders should provide Regular Intaglio Ink & Color Shift Intaglio Ink consumption of their machine in Kgs to produce one billion banknotes with respect to denomination of Rs.500 in the Table 1 below.

- 260 Working days per Year
- Rate: Rs.8.00/- per KWH shall be used for calculation of cost of power consumption
- Life cycle period considered – 10 years
